

ATRAD, the Association for Radial Pain Therapy, promotes research and application of Extracorporeal Shockwave Therapy (ESWT) using the Swiss DolorClast® method (i.e., Radial Shock Wave Therapy) and national and international dissemination of knowledge from science and practice in the interests of improving patient care.

Based on successful participation in the
ATRAD certification course
on 29 October 2010 in Berlin (Germany),
ATRAD awards

Dr. Paul Morrissey
from United Kingdom

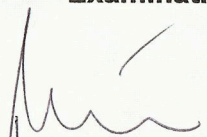

the

ATRAD Certificate I

The certification course comprised the following topics:

- **Basic knowledge and main characteristics for further use and practice**
- **Application of shock waves for the following indications: calcifying tendinitis of the shoulder, epicondylitis humeri radialis, plantar fasciopathy, achilles tendinopathies, other tendon and ligament pathologies, trigger point treatment, pseudoarthrosis, wound healing**
- **General questions on the application, experience, current scientific literature and publications**
- **Legal and regulatory aspects, reimbursement questions**
- **Hands-on workshop**
- **Examination**

Prof. Dr. med. Markus Maier
